COVID-19 Data Report

Data through March 17, 2022

Updated March 18, 2022

Update Schedule: Every Monday, Wednesday and Friday (excluding holidays) by 3pm

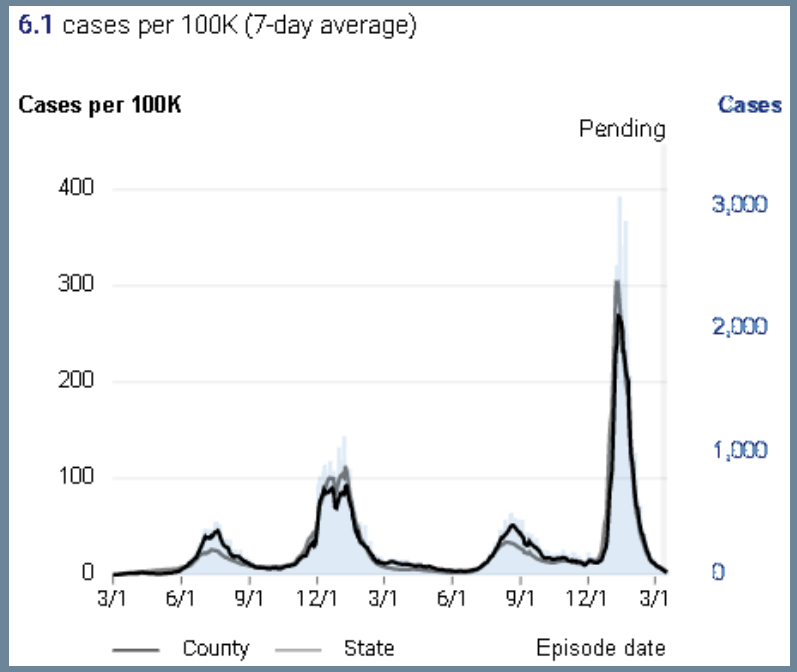
Report produced by: San Joaquin County, Public Health Services, Epidemiology

San Joaquin County
Public Health Services
health grows here

Total Number of Cases and Deaths

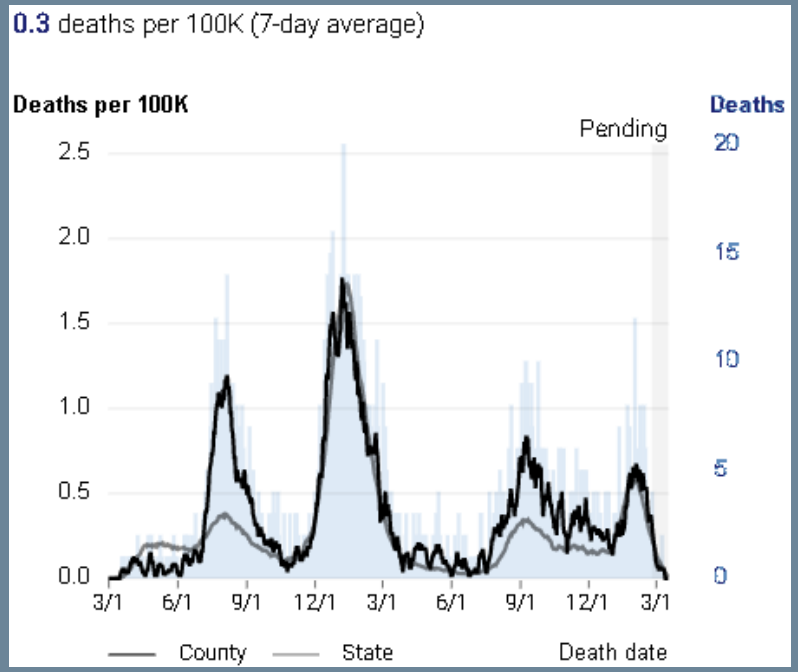
Total Cases

- **Total Number of Cases: 166,750**
- **Total New Cases Since Previous Report: 181**



Total Deaths

- **Total Number of COVID-19 Related Deaths: 2,179**
- **Total New Deaths Since Previous Report: 15**



Note: Case and Death Totals presented without lag. Case rate is based on a 7-day average with a 7-day lag. Rates of deaths is based on a 7-day average with a 21-day lag due to delays in receiving death certificates. Directional change is compared to the prior 7-day period Data is provided by the California Department of Public Health. The total number of cases and deaths noted here is since the beginning of the pandemic on March 1, 2020. Total new cases and new deaths are the difference between the updated weekly report and the previous report. Source: https://covid19.ca.gov/state-dashboard/

Cases and Deaths by Jurisdiction

Jurisdiction	Case Total	New Cases	Death Total	New Deaths	Case Rate per 10K (Total)
Unincorporated	29,024	28	375	6	1,722.8
Escalon	1,630	0	19	0	2,179.7
Lathrop	5,495	7	38	0	2,047.9
Lodi	14,131	12	243	1	2,080.2
Manteca	15,071	29	208	2	1,777.2
Ripon	2,894	3	35	0	1,816.7
Stockton	69,791	72	1,064	6	2,191.1
Tracy	18,634	22	131	0	1,942.4

Note: New cases and deaths are new reports that were received since the last update. The total number of cases and deaths noted here is since the beginning of the pandemic on March 1, 2020.

Cases and Deaths by ZIP Code (1 of 2)

Zip Code	Case Count	New Cases	Death Count	New Deaths	Case Rate per 10K (Total)
95202	1,445	3	44	0	1,996.7
95203	3,469	4	50	1	1,963.7
95204	6,554	8	115	2	2,069.3
95205	9,253	5	164	1	2,155.2
95206	16,484	11	209	0	2,248.8
95207	11,432	17	207	1	2,153.0
95209	9,969	10	135	0	2,227.3
95210	9,130	5	146	2	2,061.5
95211	18	0	0	0	77.9
95212	6,441	8	72	0	2,264.3
95215	5,155	5	81	0	1,945.1
95219	5,271	9	59	0	1,670.6
95220	1,199	0	17	0	1,490.9
95227	121	0	1	0	1,074.6
95230	69	0	1	0	1,314.3
95231	820	0	15	0	1,656.6
95234	0	0	0	0	0.0
95236	737	1	11	1	1,528.1
95237	658	0	7	0	1,853.5

Note: New cases and deaths are new reports that were received since the last update. The total number of cases and deaths noted here is since the beginning of the pandemic on March 1, 2020.

Cases and Deaths by ZIP Code (2 of 2)

Zip Code	Case Count	New Cases	Death Count	New Deaths	Case Rate per 10K (Total)
95240	10,882	10	216	1	2,042.1
95242	4,968	3	57	1	1,729.4
95253	0	0	0	0	0.0
95254	0	0	0	0	0.0
95258	830	2	12	0	1,981.4
95304	2,595	5	16	1	1,501.1
95320	2,595	0	30	0	1,818.9
95330	5,547	7	39	0	2,747.4
95336	8,247	14	132	1	1,714.9
95337	8,038	16	95	2	2,255.5
95361	80	0	3	0	1,315.8
95366	3,232	3	36	0	1,736.7
95367	11	0	0	0	3,333.3
95376	10,989	18	99	0	1,941.5
95377	7,016	4	30	0	2,006.9
95391	3,048	5	9	1	1,296.8
95632	172	0	1	0	1,162.2
95686	195	0	4	0	1,282.1

Note: New cases and deaths are new reports that were received since the last update. The total number of cases and deaths noted here is since the beginning of the pandemic on March 1, 2020.

Case Rate Over Time by Race/Ethnicity

	Race/Ethnicity						
Date	Black/African American	American Indian/Alaskan Native	Asian	Hispanic	Multi-Race	Native Hawaiian & Pacific Islander	White
6/3/2021	42	25.3	21.1	32.1	34.7	104.7	21.6

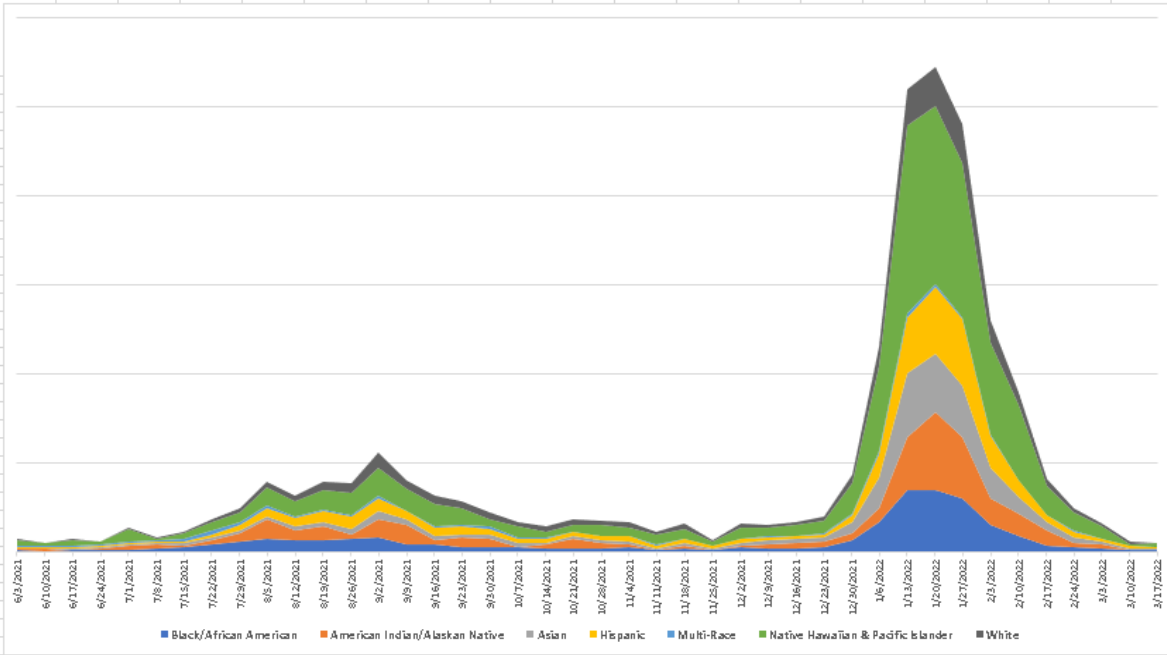
12/23/2021	122.4	101.1	96.6	83	11.6	287.9	93.4
12/30/2021	279.6	151.7	227.2	182.6	11.6	706.6	168.5
1/6/2022	679.8	303.4	680.9	544.9	57.8	1910.5	441.6
1/13/2022	1390.7	1188.4	1434.8	1249.9	96.3	4213.6	821.8
1/20/2022	1394.3	1744.6	1310.6	1513.9	53.9	4004.2	853.7
1/27/2022	1189.6	1390.6	1164.5	1479.6	38.5	3480.8	844.6
2/3/2022	608.5	606.8	659.8	722.5	27	2067.5	518.3
2/10/2022	349	505.7	380.6	377	3.9	1675	280.3
2/17/2022	151.7	328.7	193.1	162	7.7	628.1	172.9
2/24/2022	118.8	75.9	133.1	136.7	19.3	392.6	114.2
3/3/2022	84.1	75.9	73	74.9	3.9	261.7	66.3
3/10/2022	40.2	0	46.3	40.3	7.7	52.3	49.5
3/17/2022	32.9	25.3	30	28.4	0	78.5	23.6

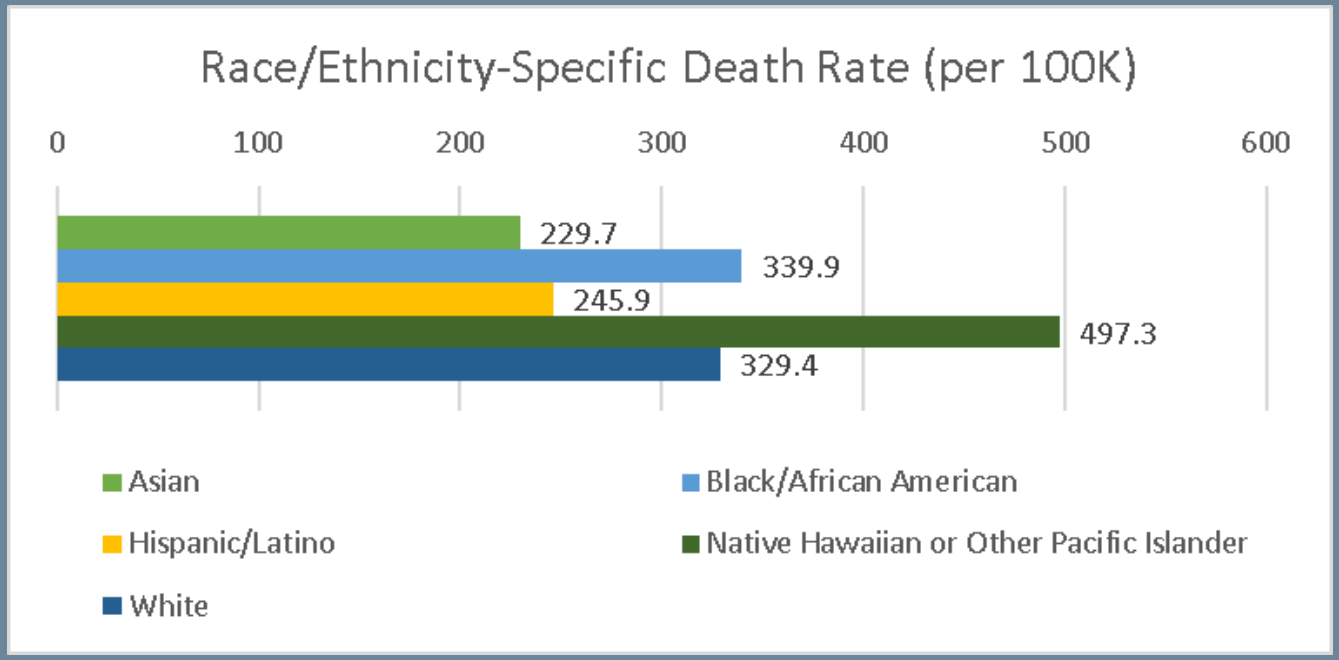


Notes: 7-day case rate (episode date with no lag). This stacked area shows the magnitude of change over time and to draw attention to total cases over time. American Indian/Alaskan Native and Native Hawaiian/Other Pacific Islander are now included in the graph , which has affected the color legend. Additionally, these race/ethnicity populations have unstable rates so use caution when interpreting their results.

- **Beginning in January 2022, there was a significant increase in case rate amongst all Race/Ethnicity populations.**
- **Since the end of January 2022, there has been a decrease in case rate amongst all Race/Ethnicity populations.**

Deaths by Race/Ethnicity

Race/Ethnicity	% Pop	Total Deaths	% Deaths
Asian	15.7	283	13.0
Black/African American	7.0	186	8.5
Hispanic/Latino	40.9	788	36.2
Native Hawaiian or Other Pacific Islander	0.5	19	0.9
White	32.0	825	37.9



Note: The total number of deaths noted here is since the beginning of the pandemic on March 1, 2020. The Native Hawaiian or Other Pacific Islander population has an unstable rate so use caution when interpreting their results.

Case Rate Over Time by Age Group

	Age Group									
Date	0-4	5-17	18-34	35-49	50-59	60-64	65-69	70-74	75-79	80+

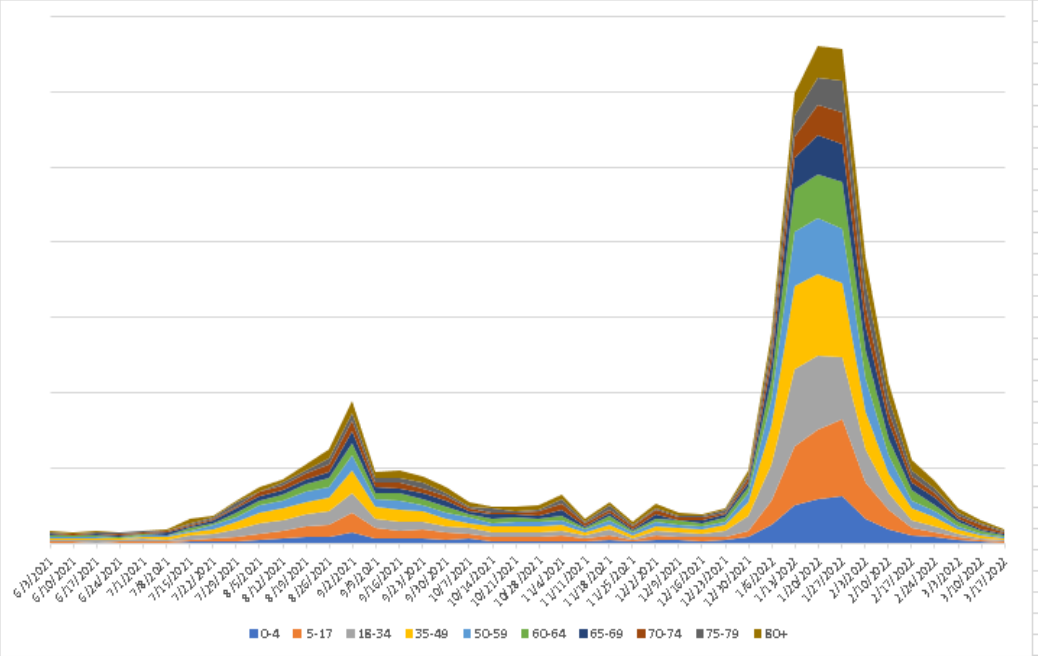
3/17/2022	20.8	25.2	39.1	38.1	44	35.1	35	43.9	62.1	28.5

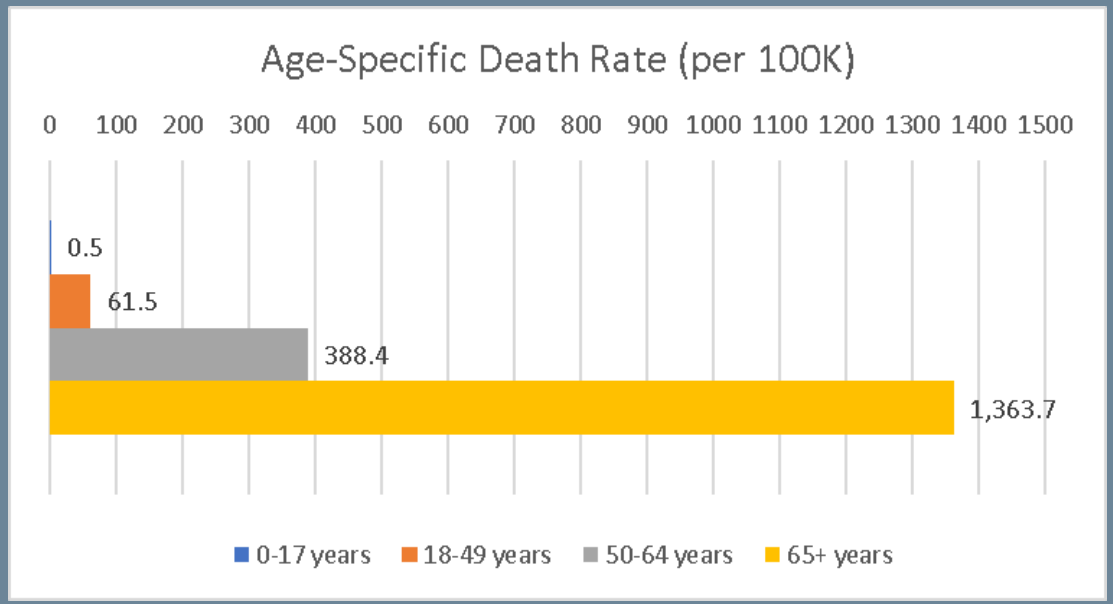


Note: 7-day case rate (episode date with no lag). This stacked area shows the magnitude of change over time and to draw attention to total cases over time.

- **Beginning in January 2022, there was an increase in case rate amongst all age groups.**
- **Since the end of January 2022, there has been a decrease in case rate amongst all age groups.**

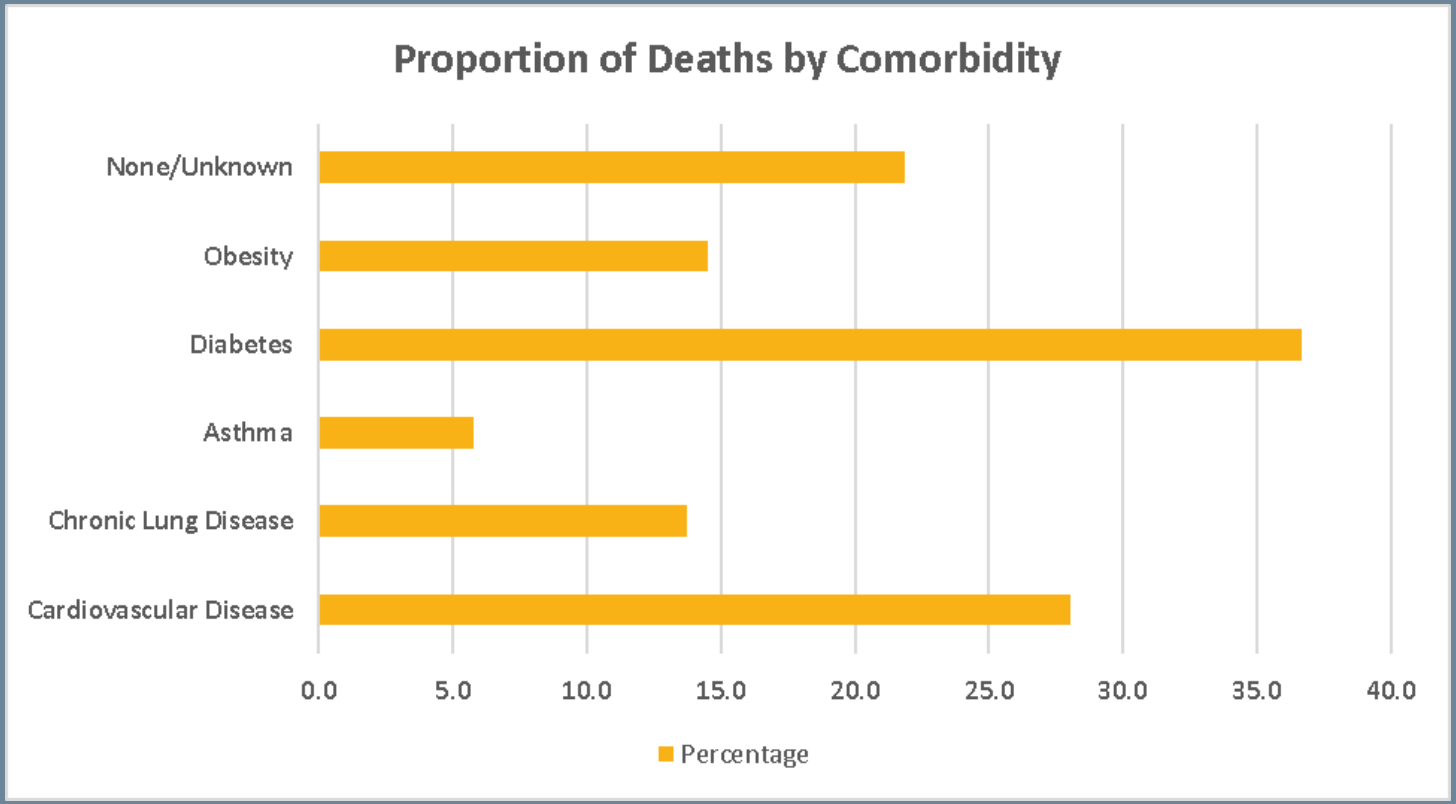
Deaths by Age Group

Age Group	% Pop	Total Deaths	% Deaths
0-17 years	24.9	1	0.0
18-49 years	44.3	213	9.8
50-64 years	17.4	528	24.2
65+ years	13.5	1438	66.0



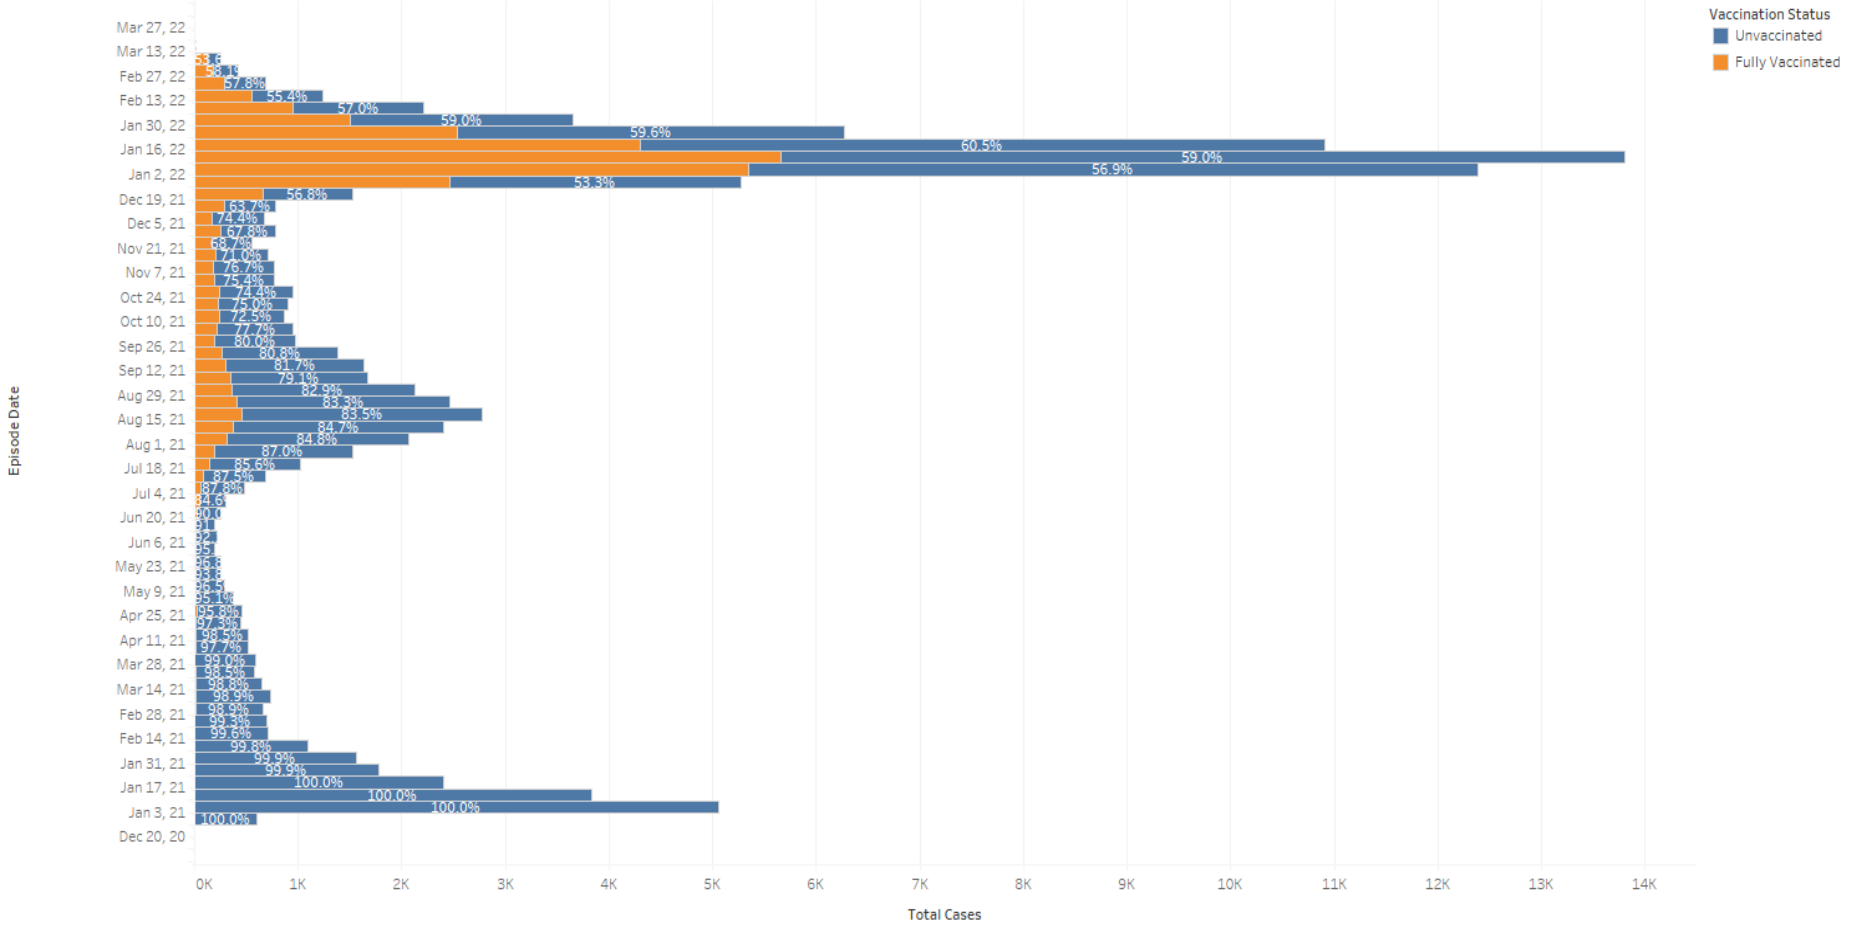
Note: The total number of deaths noted here is since the beginning of the pandemic on March 1, 2020.

Deaths by Comorbidities



Note: Will not total 100%. Cases may have more than one comorbidity.

Post-Vaccine Breakthrough Cases by Week

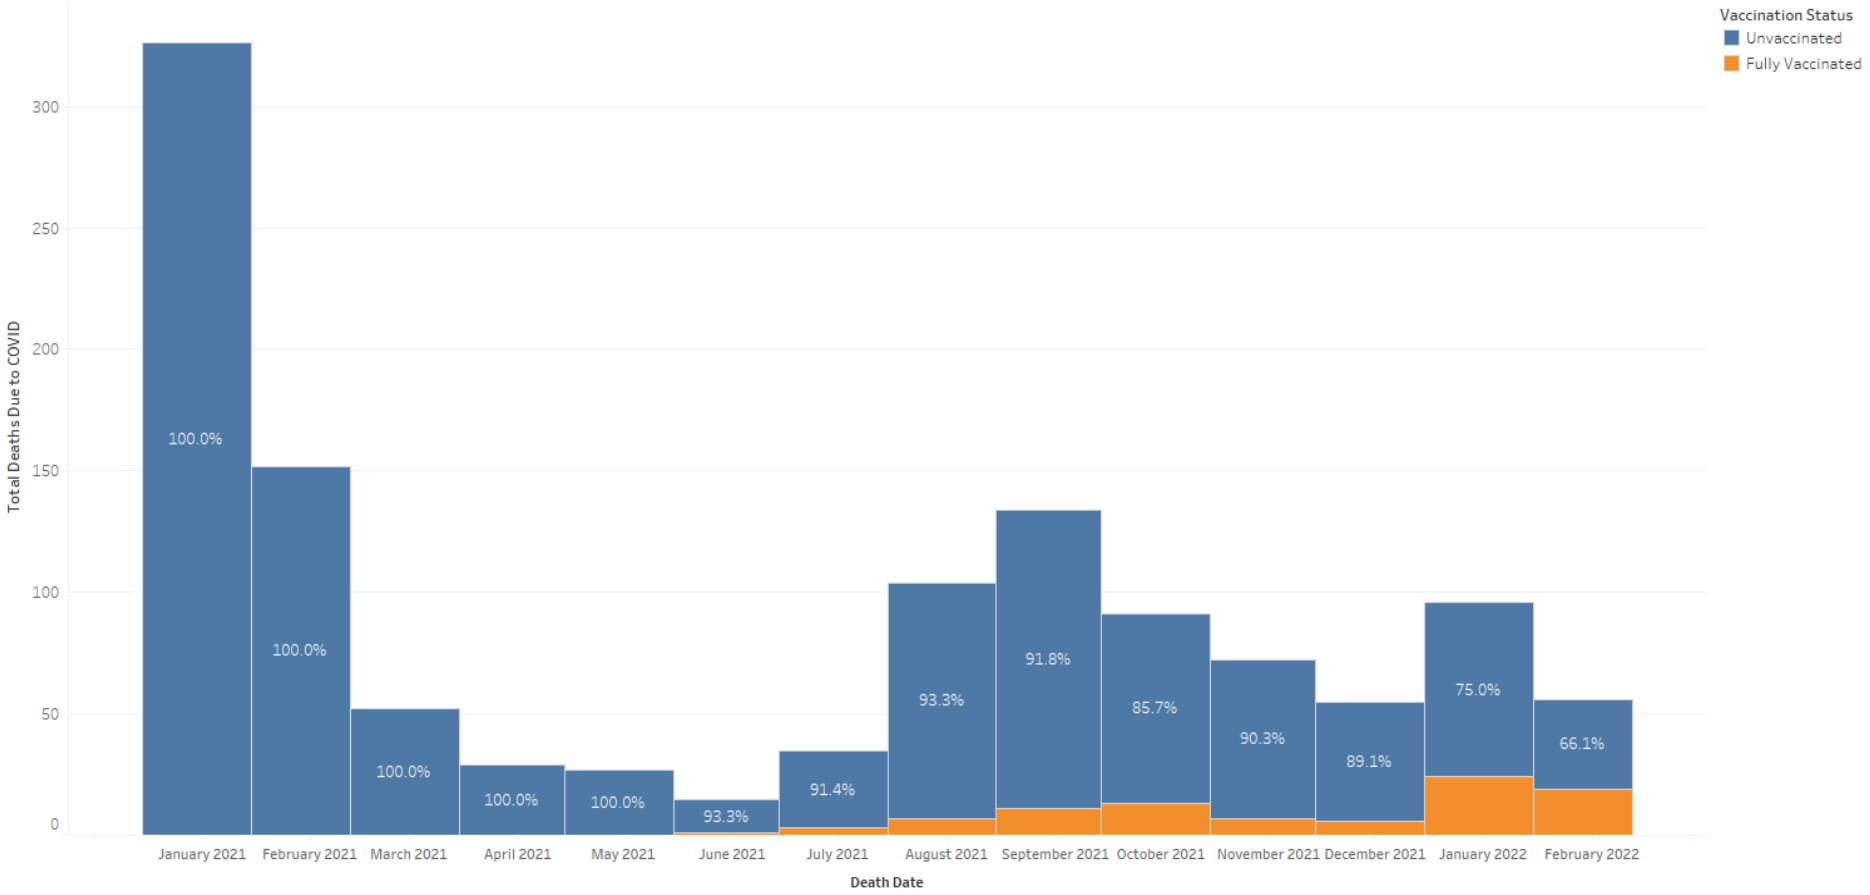


The plot of Total Cases for Episode Date Week. Color shows details about Vaccination Status. The marks are labeled by % of Total Cases, excluding Partially Vaccinated Cases. The data is filtered on Episode Date Year, which keeps 2021 and 2022.

Note: Case Vaccination Status determined by probabilistic matching of the immunization registry and case data, performed by the California Department of Public Health. Per the data provided by CDPH, the blue has been updated to only include Unvaccinated Cases. Partially Vaccinated Cases are not included in this data. Data through March 13, 2022. Updated every Friday.

- **Total case counts decreased in February 2022, with unvaccinated cases making up to 55%-60% of the total.**
- **6.68% of our County's fully vaccinated population are breakthrough cases. (*This is not depicted in the graph above*)**

Post-Vaccine Breakthrough COVID-19 Related Deaths by Month



The plot of Total Deaths Due to COVID for Date of Death Month. Color shows details about Vaccination Status. The marks are labeled by % of Total Deaths Due to COVID, excluding Partially Vaccinated Cases. The data is filtered on Death Status, Date of Death Year, and COVID Death Status. The Death Status filter keeps Yes. The Date of Death Year filter keeps 2021 and 2022. The COVID Death Status filter keeps Yes.

Note: Case Vaccination Status determined by probabilistic matching of the immunization registry and case data, performed by the California Department of Public Health. Per the data provided by CDPH, the blue has been updated to only include Unvaccinated Cases. Partially Vaccinated Cases are not included in this data. Data through March 13, 2022. Updated every Friday.

- **Around 58% of the COVID-19 related deaths in February 2022 were unvaccinated San Joaquin County residents (excluding partially vaccinated cases).**

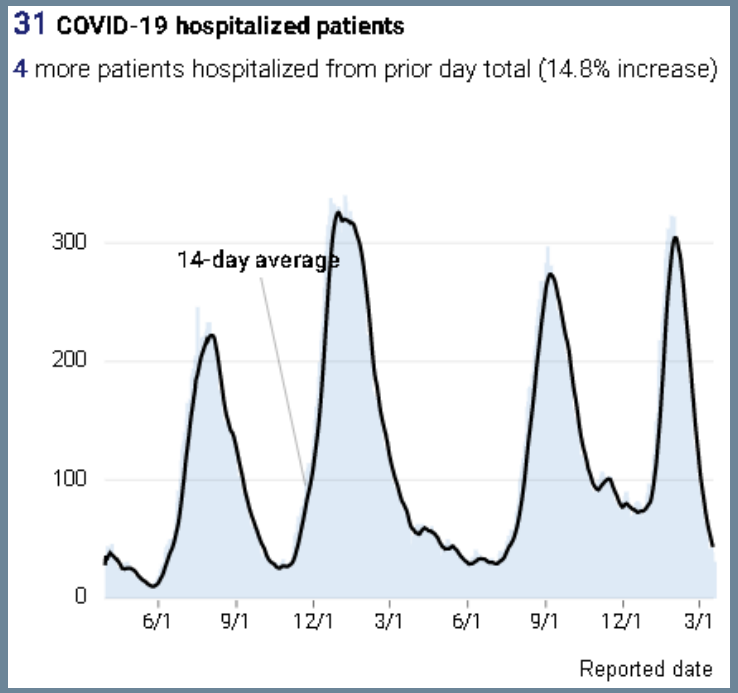
Mu (B.1.621 & B.1.621.1)									2	2							
Omicron (B.1.1.529 & BA Linea..														78	592	473	20
Grand Total	1	19	55	47	54	34	108	40	305	599	427	439	504	260	598	473	20

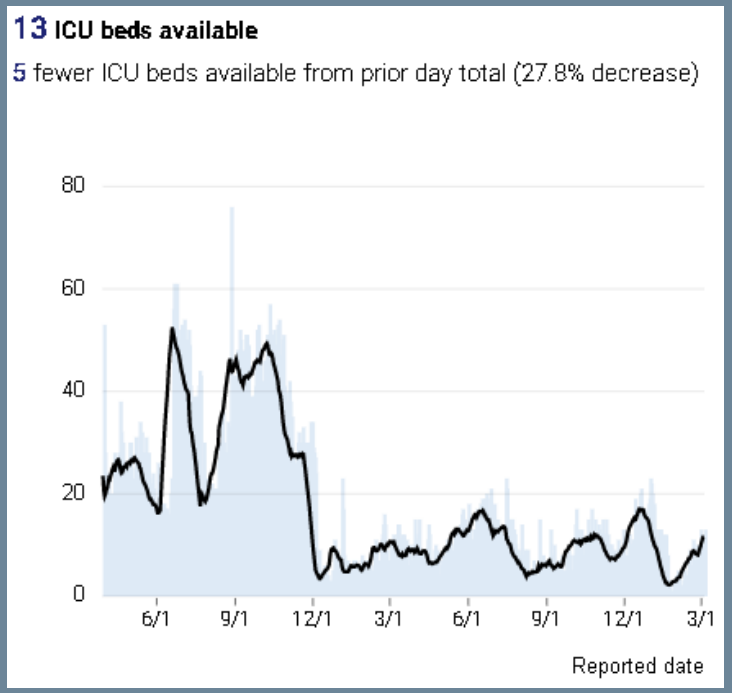
This slide includes only Electronic Lab Results. The data may differ from previous report since we are no longer counting manually entered results and only counting Electronic Labs results. There may be duplicate lab results that are currently being counted but are in the process of being cleaned from the data.

Total Hospitalizations and ICU Beds

Total Hospitalizations



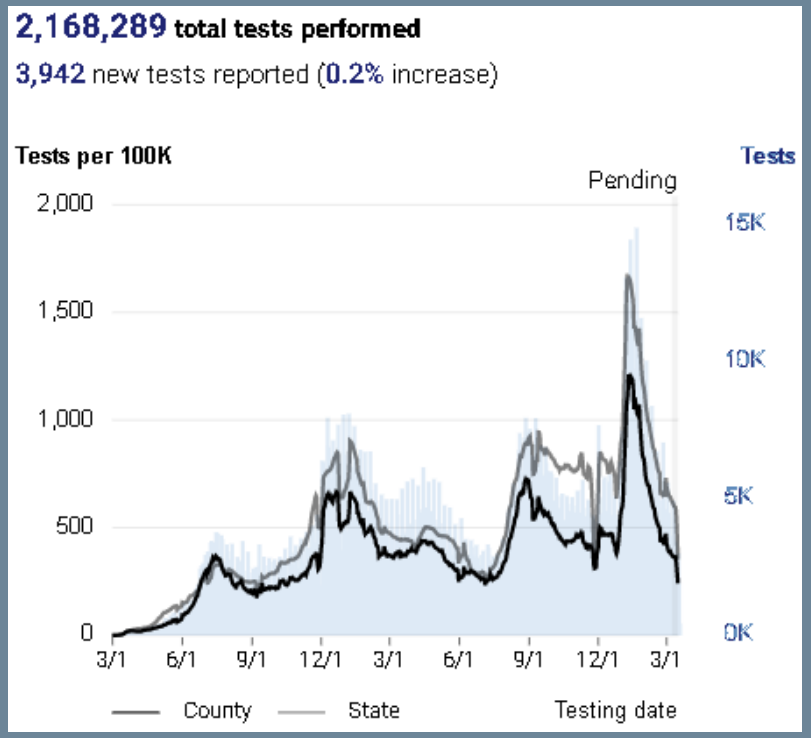
ICU Beds Available



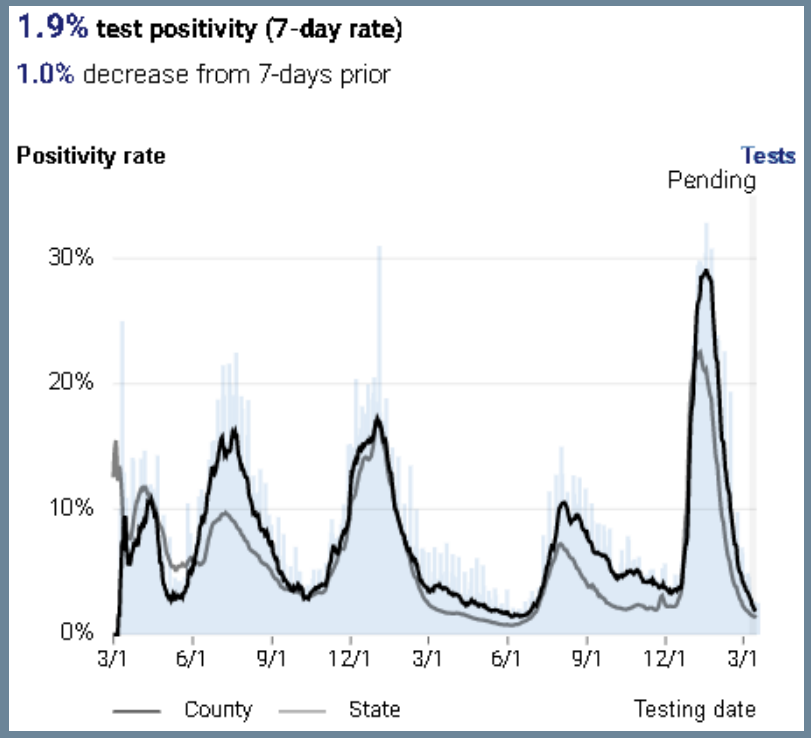
Note: Includes the number of licensed ICU beds and hospitalized patients in San Joaquin County, regardless of residency. Licensed ICU bed totals count the number of beds that can be staffed to provide intensive healthcare. Directional change is compared to the prior day. Data is provided by the California Department of Public Health. The total number is since the beginning of the pandemic on March 1, 2020.
Source: https://covid19.ca.gov/state-dashboard/

Testing and Positivity Rate

Tests Performed



Positivity Rate

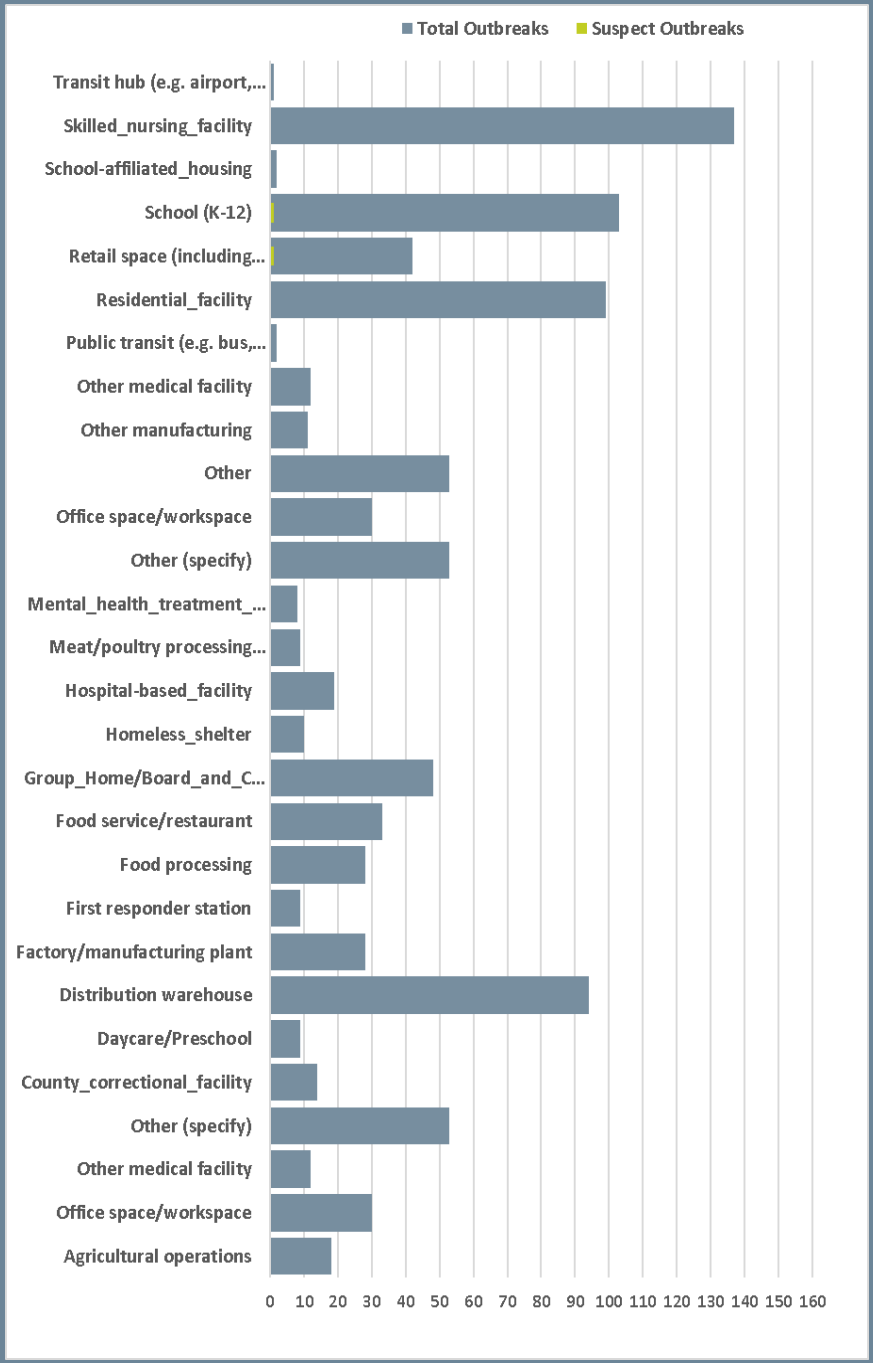


Note: Testing date is the date the test was administered. Test positivity is based on a 7-day average with no lag. Directional change is compared to the prior 7-day period. Data is provided by the California Department of Public Health. The total number is since the beginning of the pandemic on March 1, 2020. Source: https://covid19.ca.gov/state-dashboard/

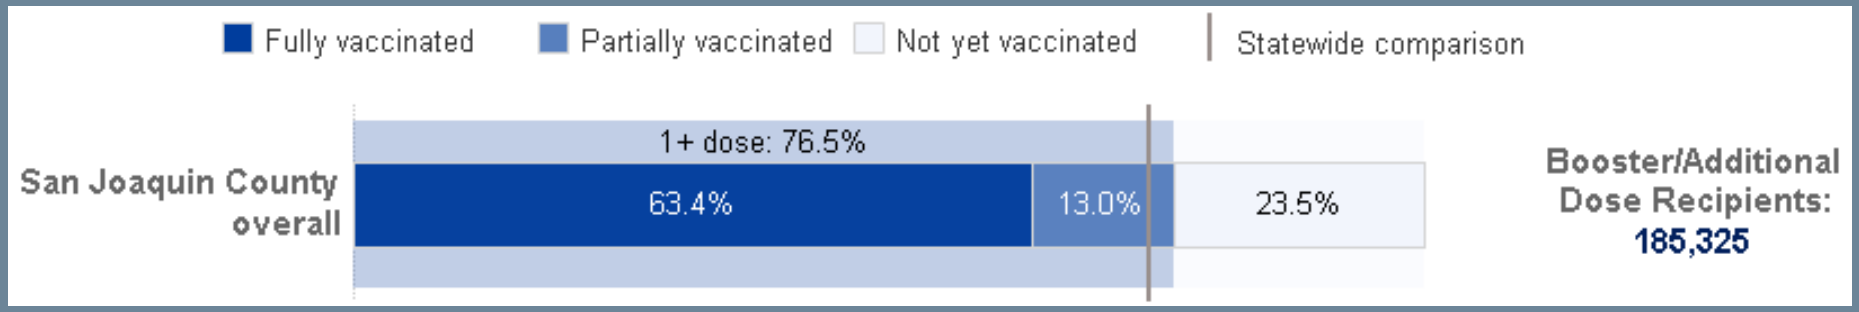
Outbreaks by Industry

- Suspect outbreaks are outbreaks that have been reported to PHS since July '21 and are currently under investigation to determine whether the report constitutes a confirmed outbreak.
    - Suspect outbreak numbers can vary over time as information is verified.
- The same site can have multiple suspected outbreaks occurring at the same time.
- Total outbreaks are outbreaks that have been confirmed since the beginning of the pandemic, March 1, 2020.

(refer to Definitions – Outbreaks for more info)



Vaccination Progress Overall



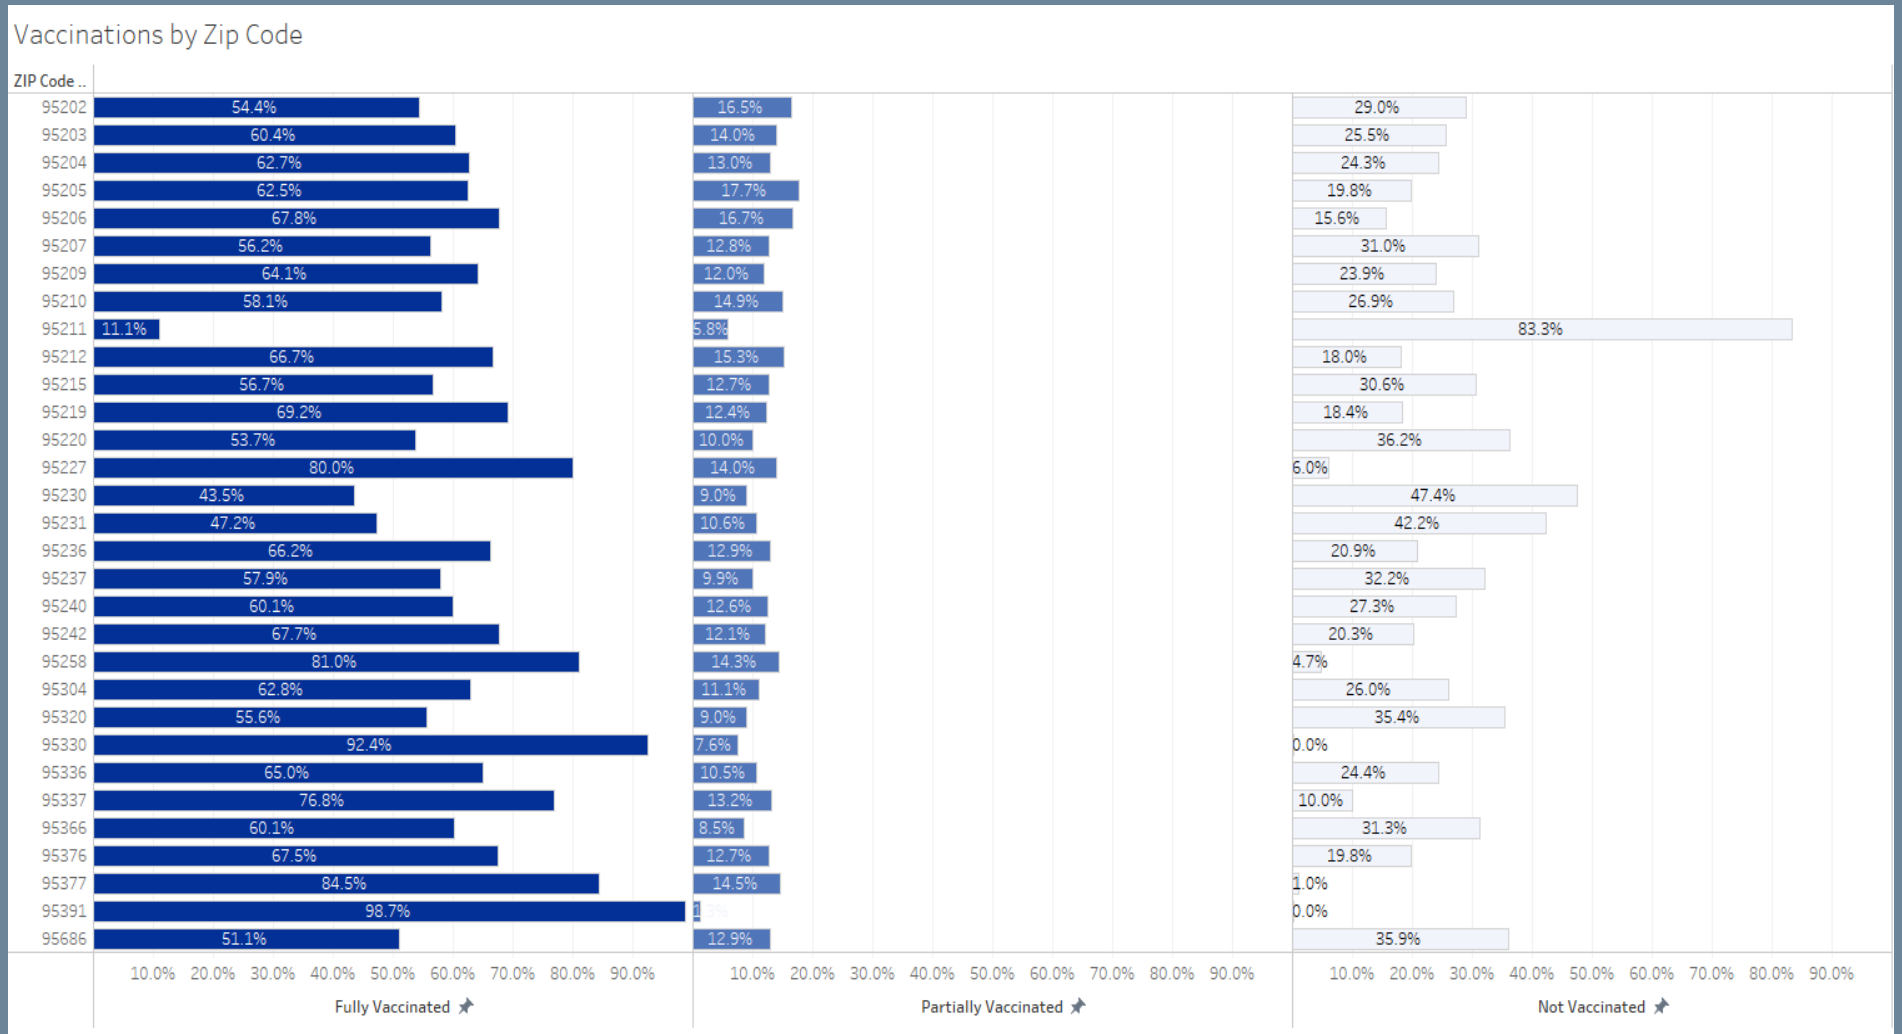
Note: Vaccination breakdowns are updated every Wednesday. CDCR-incarcerated individuals may not be represented.
***Data source: COVID-19 LHJ Vaccine Progress Dashboard (Internal)*

Vaccinations by Jurisdiction

Jurisdiction	% Fully Vaccinated	% Partially Vaccinated
Stockton	76.2	17.5
Tracy	87.9	16.7
Lodi	73.0	14.3
Manteca	77.3	12.9
Escalon	95.6	15.3
Ripon	68.0	9.7
Lathrop	94.0	15.8
Unincorporated	15.7	3.1
Total	63.4	13.0

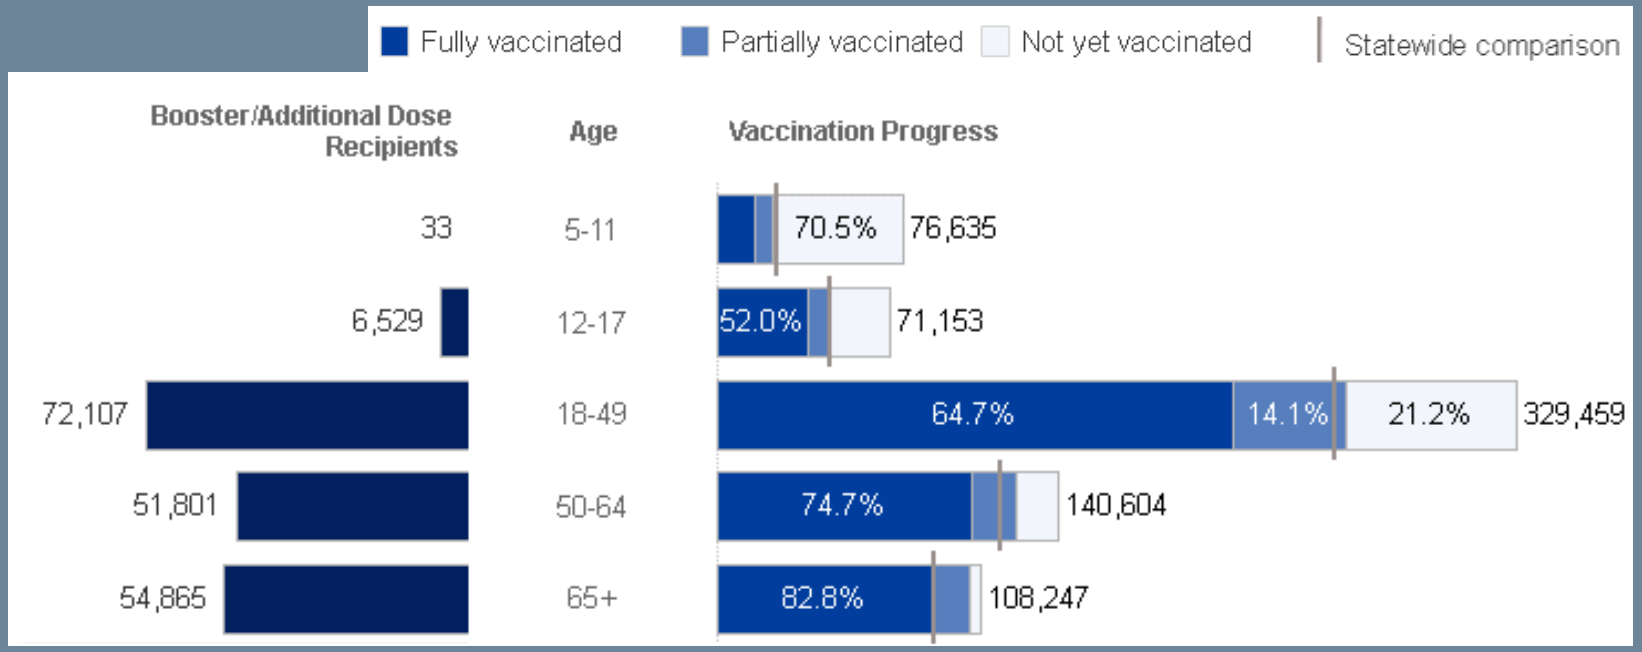
Note: The population estimate is not a precise count of current residents, which can cause an overestimate of individuals who are vaccinated. Population estimates for each Jurisdiction have been updated to the 2019 American Community Survey (ACS) 5-Year Estimates. Population estimates are for individuals 5 years and older. The Total Population Estimate has been updated to the 2021 San Joaquin County Population Projection from the Department of Finance, to be consistent with the CDPH population denominator.

Vaccinations by Zip Code



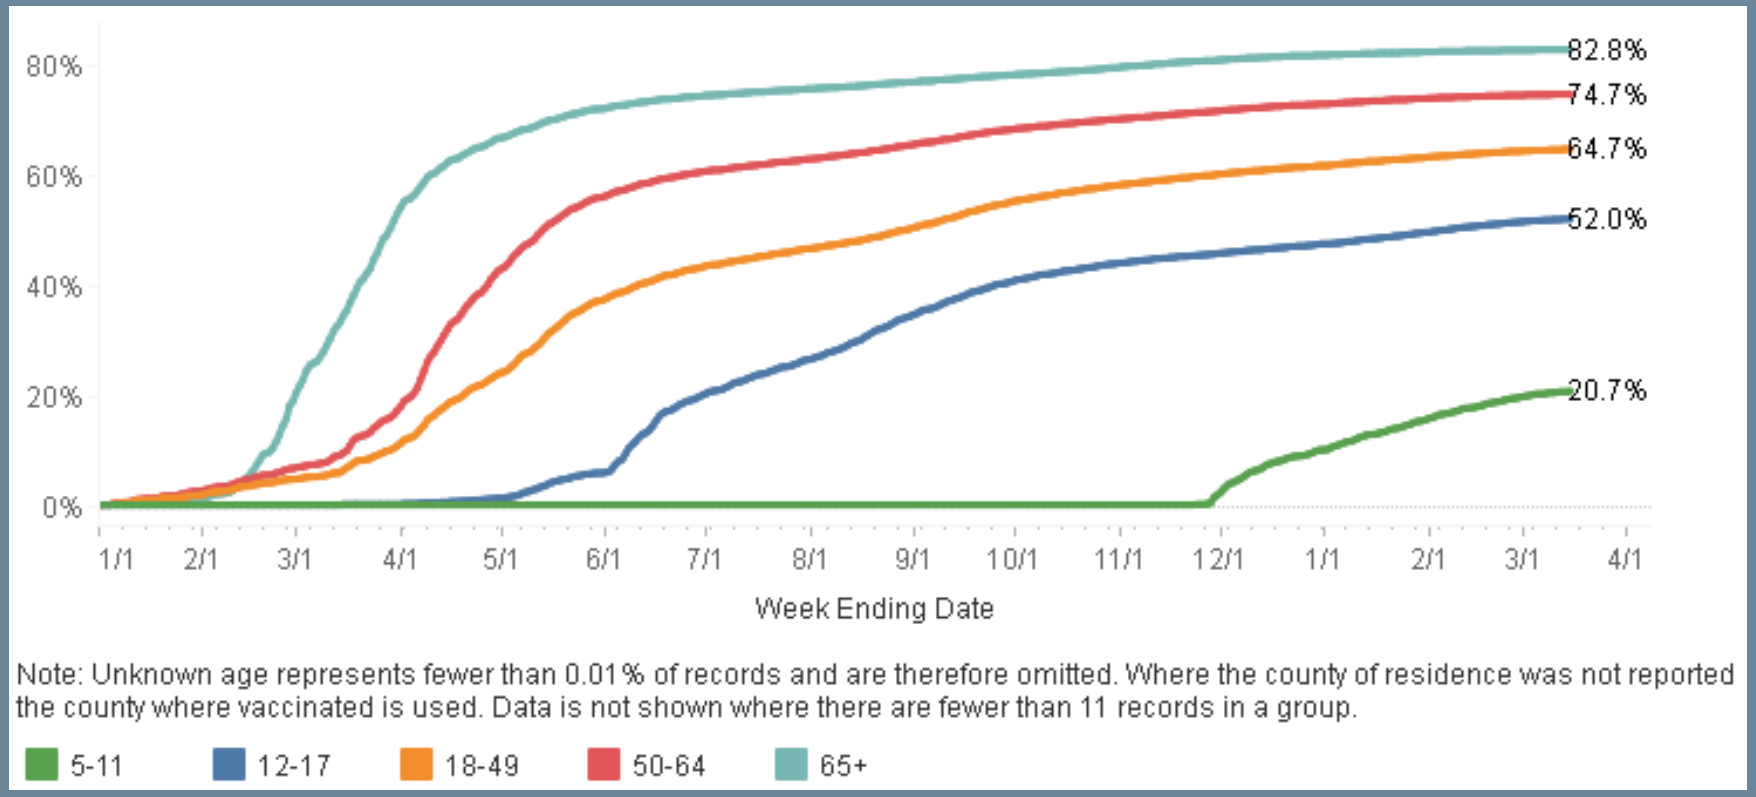
Note: Vaccination breakdowns are updated every Wednesday. Addresses for CDCR-incarcerated individuals are often incomplete and vaccinations may not be represented in this chart for Zip Codes 95215 and 95376. Percentages of Fully Vaccinated capped at 100% where they exceed age 5+ population due to variability in population estimates. Data source: COVID-19 LHJ Vaccine Progress Dashboard (Internal)

Vaccination Progress by Age Group



Note: Vaccination breakdowns are updated every Wednesday.
***The data source for this chart has been changed: COVID-19 LHJ Vaccine Progress Dashboard (Internal)*

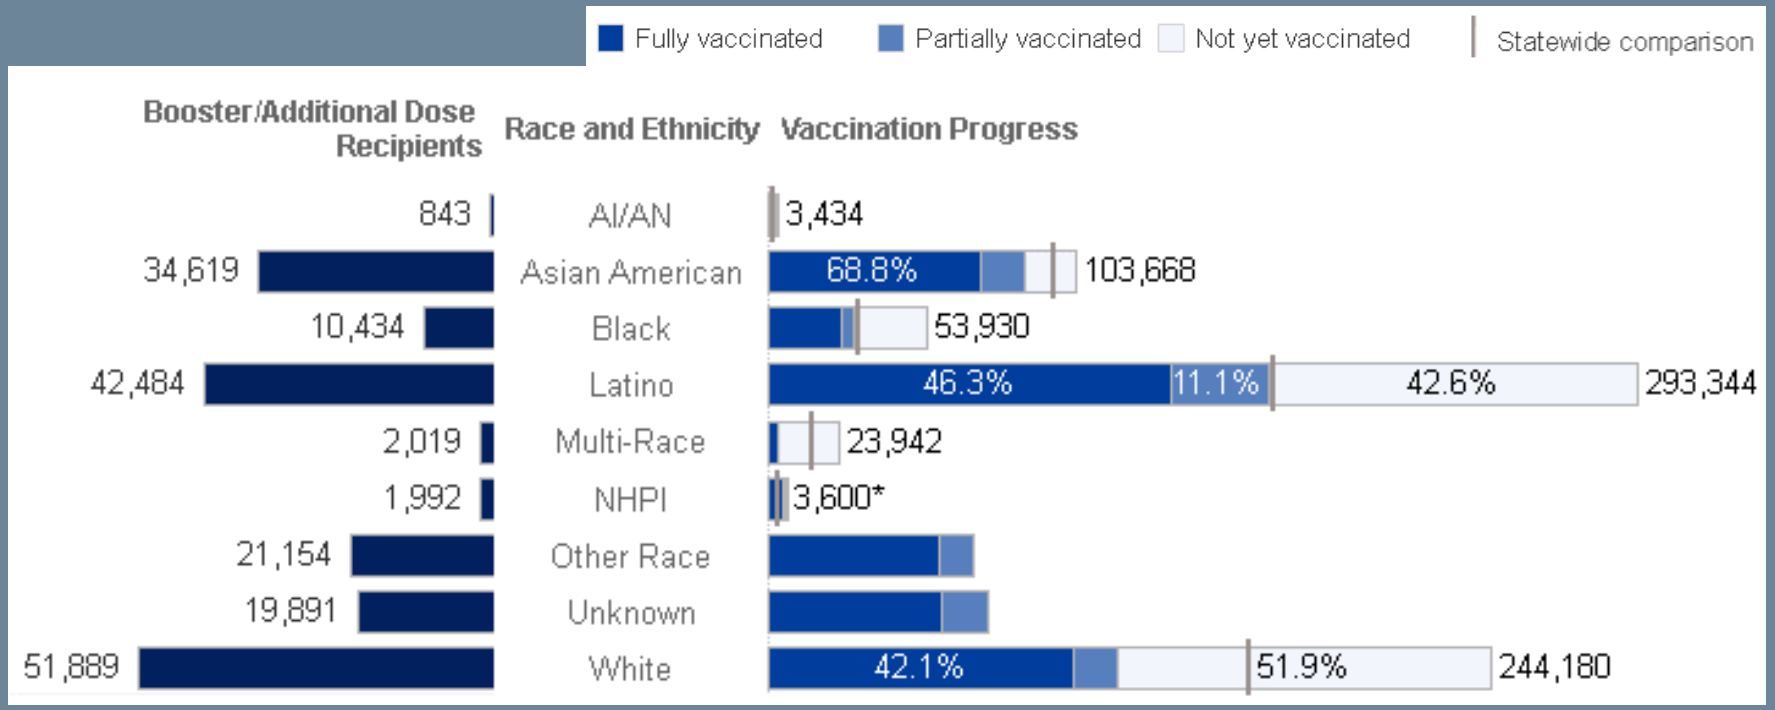
Fully Vaccinated Over Time by Age Group



Note: Vaccination breakdowns are updated every Wednesday. Source: https://covid19.ca.gov/vaccination-progress-data/#equitably-across-groups

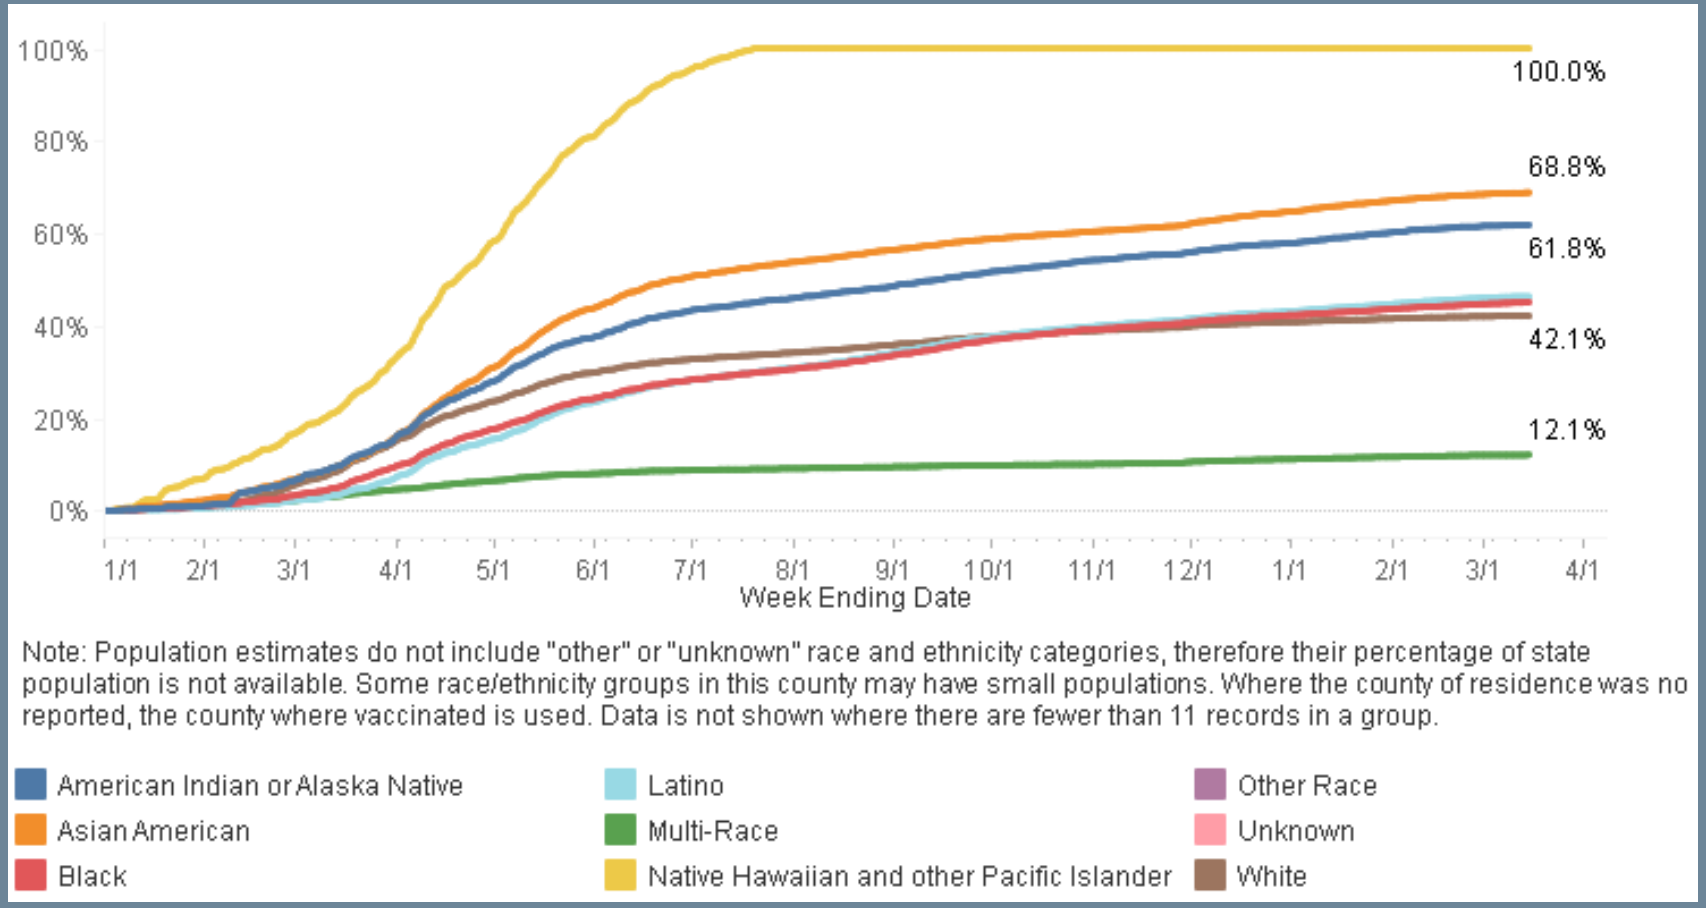
Percentages may have changed due to the addition of 5-11 year olds to the vaccine eligible population.

Vaccination Progress by Race/Ethnicity



Note: Vaccination breakdowns are updated every Wednesday.
***The data source for this chart has been changed: COVID-19 LHJ Vaccine Progress Dashboard (Internal)*

Fully Vaccinated Over Time by Race/Ethnicity



Note: Vaccination breakdowns are updated every Wednesday. Source: https://covid19.ca.gov/vaccination-progress-data/#equitably-across-groups

Percentages may have changed due to the addition of 5-11 year olds to the vaccine eligible population.

Definitions – Cases, Deaths, and Positivity Rate

- Cases:
  - Confirmed: Detection of SARS-CoV-2 RNA in a clinical specimen (swab) using a molecular amplification detection test (PCR).
    - A patient is counted only once if they have multiple positive tests.
  - Not Counted: Antigen or antibody tests.
  - Episode date is the estimated earliest date of the case's illness.
- Deaths:
  - COVID-19 is listed as the leading cause of death or significant condition on the death certificate as per CDPH's definition. May be removed from the total once the final ICD-10 code is received.
  - There is a substantial delay in receiving notification of deaths. Totals by week will change as PHS receives information.
- Positivity Rate:
  - Positivity rate is calculated as the number of positive molecular tests divided by the total molecular tests performed.

Definitions - Outbreaks

- **Health Care Facilities:**
  - Acute Hospital Facilities:
    - Patients: At least two lab confirmed COVID-19 in patients 7 days after admission for a non-COVID condition in which: (a) have a common source (i.e., unit and/or healthcare provider), (b) are not contacts to one another outside the facility, (c) are from different households.
    - Health Care Providers: 2-3 lab confirmed cases within two weeks in which (a) have a common source (i.e., unit), (b) are not contacts to one another outside the facility, (c) are from different households.
  - Long-Term Care Facilities: At least one lab confirmed COVID-19 in a resident, that was acquired in the facility.

For more detailed information, refer to https://www.cdph.ca.gov/Programs/CHCQ/LCP/Pages/AFL-20-75.aspx

- **Non-Health Care Facilities:**
  - Residential Congregate Settings (non-healthcare): At least three probable or confirmed cases (residents and/ or employees) within two weeks in which: (a) have common source and (b) are not identified as contacts to each other in any other case investigation.
    - Examples include dormitories, group homes, jails, prisons, shelters.
  - Non-Residential Congregate Settings (non-healthcare): At least three probable or confirmed cases within two weeks in which: (a) have a common source, (b) are from different households, (c) are not identified as contacts to each other in any other case investigation.
    - Examples include workplaces, childcare facilities, schools, weddings, churches.

For more detailed information, refer to https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/OutbreakDefinitionandReportingGuidance.aspx

Disclaimers

- Data are preliminary and subject to change as information is verified. Numbers do not represent true day-over-day changes as these results include cases from prior days. This information may not match other state websites due to differences in when the data was pulled, and the data sources used.
- Case/Death Counts by Jurisdiction and ZIP Code are processed through geocoding software to determine if they are found within the City Limits or ZIP Code boundaries. Cases without a known address, cases that are homeless, and cases with street addresses that cannot be accurately located are not included in the Case/Death Counts but are included in the County total.
- Variant results: Do not represent the total number of variant infections as not all positive COVID-19 cases can be sequenced. It can take a few weeks (sometimes up to 1 month) to receive sequencing results. The total number of specimens being sequenced is unknown, as labs/providers choose what specimens to send and where. San Joaquin County Public Health Services tends to receive more sequencing results from vaccinated cases, hospitalized cases, and cases that are connected to outbreaks.
- Vaccinations: Population estimates are for individuals 5 years and older. The reporting of vaccine administration data into the immunization registries is consistently an under-count of actual number of doses administered locally, due to incomplete and delayed reporting into these systems. Providers that receive the vaccine are responsible for entering information into an immunization registry (Healthy Futures or CAIR2). Vaccine administration data is extracted from these registries. Administered doses are not counted if there is uncertainty regarding the county of residence. May not include the following vaccinations of San Joaquin Residents: Individuals vaccinated but are not reported in California Immunization Registries or vaccinated at Federal facilities (VA, Prisons, Skilled Nursing Facilities).
- For “>99.9%” values: These values should be interpreted with caution as they may result from numerator-denominator mismatches for the following reasons: 1) Population projections are estimates and thus have a margin of error; this error can result in >99.9% values particularly for small populations. 2) Individuals identifying with race/ethnic groups outside of Federal Office of Management and Budget (OMB) classifications may cause those groups to exceed 99.9% (e.g. Asian ethnicities identifying as NHPI). 3) Metrics for small populations may be disproportionately affected by geocoding errors or non-resident individuals.
